The dredging project with an estimated cost of about \$18 million will be carried out in the Mariupol port in eastern Donetsk region and the Berdyansk port in southern Zaporizhia region, said the statement on the USPA website, [Xinhua reported](#).

The planned volume of the dredging works in both ports is 2.9 million cubic meters. The project is set to be completed within eight months after the start.

The USPA said it hopes to get propositions from local and foreign contractors during the bidding process that ends on February 2, 2018.

"I strongly invite dredging companies to take part in this tender and I hope for its success. The project would have an impact on the functioning of our two ports and on the overall cargo logistics
