ΘΕΜΑ: Προκήρυξη διαγωνισμού για την παραχώρηση του τερματικού σταθμού συνδυασμένων μεταφορών των Τιράνων

Ο Δήμος Τιράνων προχώρησε στις 4 Ιανουαρίου τ.έ. στην προκήρυξη διαγωνισμού για την παραχώρηση του τερματικού σταθμού συνδυασμένων μεταφορών των Τιράνων, με το καθεστώς της σύμπραξης ιδιωτικού και δημόσιου τομέα (ΣΔΙΤ).

Η σύμβαση περιλαμβάνει την λεπτομερειακή μελέτη και την κατασκευή του νέου τερματικού σταθμού δημοσίων συγκοινωνιών των Τιράνων, καθώς και την μετέπειτα συντήρηση και διαχείρισή του. Η διάρκεια της σύμβασης παραχώρησης θα καθορισθεί από την προσφορά της νικήτριας εταιρείας και θα είναι το μέγιστο 35 έτη. Η εκτιμώμενη αξία του έργου ανέρχεται σε 15.477.857,31 €, μη συμπεριλαμβανομένου του ΦΠΑ.

Η αναθέτουσα αρχή θα προσφέρει στον ανάδοχο, σε μακροχρόνια βάση, ένα οικόπεδο, έκτασης 85.000 τετραγωνικών μέτρων, κατά μήκος της εθνικής οδού Τιράνων - Δυρραχίου, για την κατασκευή και εν συνεχεία λειτουργία του τερματικού σταθμού.

ΑΔΙΑΒΑΘΜΗΤΟ

Η προθεσμία υποβολής των προσφορών, μέσω της ηλεκτρονικής πλατφόρμας www.app.gov.al, είναι 27 Φεβρουαρίου 2017, στις 11:00 π.μ. Η προσφορά, καθώς και όλα τα απαραίτητα έγγραφα θα πρέπει να υποβληθούν στα αλβανικά ή στα αγγλικά. Η αίτηση πρέπει να συνοδεύεται από εγγυητική επιστολή, ύψους 2% της προβλεπόμενης αξίας του έργου ή 310.000 €.

Τα τεύχη δημοπράτησης είναι διαθέσιμα, σε ηλεκτρονική μορφή, δωρεάν, στην ιστοσελίδα του Φορέα Δημοσίων Προμηθειών της Αλβανίας (Agjencia e Prokurimit Publik - APP) και συγκεκριμένα στο σύνδεσμο <https://www.app.gov.al/ep/contractnotice.aspx> χρησιμοποιώντας τον αριθμό αναφοράς του διαγωνισμού (REF-64927-12-30-2016) στο πεδίο «Call Number» ή «Numri i Shpalljes», ανάλογα με την επιλεγμένη γλώσσα. Τα πλήρη τεύχη δημοπράτησης, συμπεριλαμβανομένης της μελέτης σκοπιμότητας και της προκαταρκτικής μελέτης, είναι διαθέσιμα από τον Δήμο Τιράνων, δωρεάν, κατόπιν γραπτού αιτήματος, στον κ. Genc Kojdheli (E-mail: genc.kojdheli@tirana.al).

Προς διευκόλυνσή σας, αποστέλλεται, συνημμένως, η σχετική προκήρυξη του διαγωνισμού και παρακαλούμε για την ενημέρωση των μελών σας.

INVITATION TO TENDER

Tirana Municipality invites to submit tenders to perform the following:

The Municipality of Tirana or "**Contracting Authority**", invites Economic Operators in an international tender procedure to tender for the Public Private Partnership for the detailed design and execution of the construction of a new public transport terminal, maintenance as well as the subsequent management of the Tirana public transport terminal (hereinafter referred to as the "**Project**") in accordance with the procedures and criteria set forth in the tender documents and the terms of the contract. The estimated Project Value is EUR 15.477.857,31 (fifteen million four hundred seventy-seven thousand eight hundred fifty-seven point thirty-one), VAT excluded.

The Contracting Authority will apply the open tender procedure pursuant to Art. 22 of Albanian Concessions and Public Private Partnership Law no. 125/2013. The Contracting Authority will consider only the tenders of those Tenderers or consortia of Tenderers which have passed the minimum thresholds set out in the Qualification Criteria.

During the construction of the terminal, the objective of the Contracting Authority is to improve overall mobility by providing a full-capacity transport terminal to allow intercity coaches to unload passengers to urban buses and taxis along the city's principal corridor to the north, west and south part of the country, thereby reducing traffic congestion in the city centre, improving air pollution and reducing fuel consumption for public transport.

The Contracting Authority will offer an 85,000 square metre land plot situated along the main corridor leading north-westerly out of the city toward Durres to be contracted out on a long-term basis to the Successful Tenderer to build, operate and maintain the terminal for the benefit of operators and passengers. In exchange, all bus docking fees, retail rental revenues, and parking fees, will be collected by the Economic Operator to amortise its initial CAPEX, operational costs, and cover debt service.

Tendering for the contract is open to companies and joint ventures of companies from any country meeting the requirements and criteria envisaged as follows:

Location of performing the employment contract

Rr e Kastrioteve, Kthesa e Kamzes, Tirana

Duration of the contract or timeframe of its execution

The duration of the concession PPP contract will be the duration offered by the Successful Tenderer until 35 years).

Tenders shall be uploaded electronically to the Public Procurement Agency website www.app.gov.al before the date of its opening.

Date: 27/02/2017

Hour: 11:00

When tenders are required to be submitted electronically, the economic operators shall upload the tender electronically on the official website of PPA: www.app.gov.al.

2.2 Brief description of the concession/public-private partnership contract

1. Scope of the contract: "For Design, Construction, Financing, Operation, Maintenance and Transfer of Tirana Public Transport Terminal"

The Municipality of Tirana or "**Contracting Authority**", invites Economic Operators in an international tender procedure to tender for the Public Private Partnership for the detailed design and execution of the construction of a new public transport terminal, its ordinary and extraordinary maintenance as well as the subsequent management of the

Tirana public transport terminal (hereinafter referred to as the "**Project**") in accordance with the procedures and criteria set forth in the tender documents and the terms of the contract. The estimated Project Value is EUR 15.477.857,31 (fifteen million four hundred seventy-seven thousand eight hundred fifty-seven point thirty-one), VAT excluded.

The Contracting Authority will apply the open tender procedure pursuant to Art. 22 of Albanian Concessions and Public Private Partnership Law no. 125/2013. The Contracting Authority will consider only the tenders of those Tenderers or consortia of Tenderers which have passed the minimum thresholds set out in the Qualification Criteria.

During the construction of the terminal, the objective of the Contracting Authority is to improve overall mobility by providing a full-capacity transport terminal to allow intercity coaches to unload passengers to urban buses and taxis along the city's principal corridor to the north, west and south part of the country, thereby reducing traffic congestion in the city centre, improving air pollution and reducing fuel consumption for public transport.

The Contracting Authority will offer an 85,000 square metre land plot situated along the main corridor leading north-westerly out of the city toward Durres to be contracted out on a long-term basis to the Successful Tenderer to build, operate and maintain the terminal for the benefit of operators and passengers. In exchange, all bus docking fees, retail rental revenues, and parking fees, will be collected by the Economic Operator to amortise its initial CAPEX, operational costs, and cover debt service.

Tendering for the contract is open to companies and joint ventures of companies from any country meeting the requirements and criteria envisaged as follows:

2. Form of contract: Concession/public-private partnership

3. Source of Funding: Private Sector

4.3 Duration of the contract or timeframe of its execution

The duration of the concession PPP contract will be the duration offered by the Successful Tenderer until 35 years.

4.4 Location of the object of the contract

Rr.kastriotëve, Kthesa e Kamzës, Tirana

This project is located in Tirana.

INSTRUCTIONS TO TENDERERS

1. Introduction

¹Added by DCM No. 401 dated 13.05.2015

(Contracting Authority) has decided to implement the project for _____. The selection of the Successful Tenderer shall be made based on a competitive procedure (type of procedure) according to the qualification and evaluation criteria as specified in this document. The duration of the concession contract / PPP is _____ from its entry into force.

1.1. Further information:

General Description

- a. **GEOGRAPHIC POSITION**

- b. **HYDROLOGICAL CONDITIONS (in case of hydropower plants concession)**

- c. **CONNECTION WITH ENGINEERING INFRASTRUCTURE**

- d. **HYDROTECHNICAL CONDITIONS (in case of hydropower plants concession)**

- e. **OTHER CONDITIONS RELATED TO THE OBJECT**

1.2. *(Unsolicited proposals only)*

The concession project _____ is unsolicited proposal approved by the Contracting Authority. Based on the DCM no. 575, dated 07.10.2013 "On approval of the rules for the evaluation and concession / public private partnership", the company _____ has received a bonus of _____ of the total points, or the project has been evaluated with ALL _____.

1.3. These instructions ("Instructions to Tenderers") as well as "Invitation to Tender" is addressed to all legal entities or their unions, which are intended to participate in this competitive selection procedure.

1.4. The Successful Tenderer shall bear all costs associated with the preparation and submission of his tender as well as any other costs as provided in these documents in accordance with Article 25 and Article 29 of Law no. 125/2013 "On concessions and public private partnership".

1.5. Contracting Authority reserves the right to terminate ultimately this competitive selection procedure. Tenderer has no right to claim any compensation for costs or losses.

2. Competitive Procedure Documents

2.1. Content

2.1.1. Type of project and technical requirements, competition procedure, terms of the contract and legal, economic and financial requirements are specified in the competitive procedure documents as follows:

APPENDIXES

Appendix 1 Tender Application Form

Appendix 2 Invitation to tender form of the Restricted Procedure or Negotiated with public notice

Appendix 3 Tender Security Form

Appendix 4 Confidential Information Form

Appendix 5 Statement of fulfilling the requirements of Technical specifications by the economic operator

Appendix 6 Statement on conflict of interest

Appendix 7 Works Execution Evaluation Form

Appendix 8 Statement of machine availability

Appendix 9 Evidence of Qualification / Participation Form

Appendix 10 Declaration on the legal status

Appendix 11 Evaluation Criteria

- Appendix 12 Self-Declarations for Foreign Tenderers
- Appendix 13 Project Implementation and Technical Specifications
- Appendix 14 Terms of Reference
- Appendix 15 Notification of Disqualification Form
- Appendix 16 Tender Admission Notification Form
- Appendix 17 General Terms and Conditions of the Contract
- Appendix 18 Special Conditions of the Contract
- Appendix 19 Contract Signing Notification Form
- Appendix 20 Contract Security Form
- Appendix 21 Appeal to the Contracting Authority Form
- Appendix 22 Power of Attorney Form

2.1.2 Each tenderers should consider the instructions, criteria, requirements, specifications, terms and all the information in the competitive procedure documents. In case the tenderer:

- i) Does not meet all documentation requirements and information on bidding procedure documents; or
- ii) Submits an offer which does not comply with the conditions and requirements of the bidding procedure documents.

The contracting authority shall determine that the offer does not comply with the requirements of the bidding procedure documents and will reject the offer.

2.2. Commentary on Standard Competitive Procedure Documents

2.2.1 Tenderer who requires clarifications or amendments to the competitive procedure documents, should submit his request through electronic procurement system. All replies together with appropriate explanations should be notified to all interested parties.

2.3. Amendments to the competitive procedure documents

2.3.1. At any time prior to the deadline for submission of tenders, in every case that makes changes to procedure documents, the Contracting Authority should extend the deadline for submission of tenders according to the law. CA may for any reason, at its discretion or in response to requests for changes from one tenderer, change the tender procedure documents.

- 2.3.2. All the amendments made by the contracting authority will be published on the website of PPA. Amended documents will be considered as competitive procedure documents for this competitive selection procedure.
- 2.3.3. To give prospective tenderers reasonable time in which to take the amendment into account in preparing their tender, the Contracting Authority may, at its discretion, extend the deadline for the submission of tenders. In this case, the Contracting Authority pursuant to the Law "On concessions and public private partnership" will publish a new deadline for the submission of tenders on the website of PPA.

3. OFFER: PREPARATION OF TENDERS

3.1. The offer should include the following documents:

- a) Tender Application Form, completed in accordance with the model attached as Appendixes 1 and DSK / PPP.
- b) Tender Security Form, completed in accordance with the model attached as Appendixes 3 and DSK / PPP
- c) Documents related to the object of the concession / public private partnership (drawings, projects, etc.

_____ ,
 _____ ,
 _____ .

An economic operator may submit only one tender.

Any false data shall constitute a legal reason for the Contracting Authority to disqualify Tenderers at any time. If it is detected or notified after the conclusion of the contract, the Contracting Authority has the right to terminate the contract relations unilaterally and to compensation for actual losses. Pursuant to the Criminal Code of the Republic of Albania, providing false information, drafting of forged or falsified documents as well as any statement or any other information that does not reflect the truth is considered a criminal offense. The tenderers shall use only the standard documents of the Tendering Process, without making any modifications to the terms thereof.

3.2. Tender Security

- 3.2.1. The Tenderer shall furnish, as part of its tender, a Tender Security, when required, according to Tender Security Form (Appendix 3), up to 2% of the value of the project proposed by the Tenderer.
- 3.2.2. Tender Security, when required, is required to be submitted in the form of a deposit or guarantee issued by a bank or an insurance company licensed by the state to perform this activity. Tenderer must guarantee, that Tender Security to be valid for a period of _____ days after the end of validity of the tender, which is _____. Therefore, the tender should be provided for _____ from the date of expiration of its submission. Contracting Authority may require the Tenderer to

extend the Tender Security Validity Period, if any, if certain circumstances affect the extension of the evaluation deadline of the respective offer or delivery of Security contract or in any other case that affects the delay of a mandatory deadline. Failure to delay the Tender Security Validity Period, if required, constitutes a cause for disqualification of Tenderers.

3.2.3. Tender Security, if required, must be submitted together with the offer prior to the deadline for submission of tenders. Any Tender not accompanied by tender security shall be rejected by the Tender Evaluation Committee.

Tender Security shall be submitted on behalf of:

- i) the company, if the Tenderer is a single company; or
- ii) the leading company, if the Tenderer is a temporary union of companies.

3.2.4 At the request of Unsuccessful Tenderers, the Contracting Authority shall return him the Tender Security, where required, as promptly as possible, but no later than 30 (thirty) days after completion of the Tender Validity Period or any extension thereof.

3.2.5 Tender Security of the Successful Tenderer, when required, will be returned to him after submission of the Security Contract to the Contracting Authority.

3.2.6 Tender Security may be held by the Contracting Authority, when required, when Tenderer:

- i) shall withdraw its tender during competitive procedure when the Tender Validity Period has not yet expired;
- ii) shall not submit Contract Security (in case the Tenderer shall win)
- iii) shall not sign the concession contract (in case the Tenderer shall win) within the time limits specified in the Tender Admission Notification Form (Appendix 16);
- iv) shall state false data in his tender;
- v) shall refuse to pay the costs according to paragraph 1.4 hereinbefore (in case the Tenderer shall win).

3.3. Power of Attorney: Any tenderer (or Temporary Union member, when there is such Tenderer) must submit a notarized power of attorney, in the form specified in Appendix 22, which indicates that the person (s) who signed the Tender have the right of its signing.

3.4. Tender validity period: Tenders shall remain valid for _____ from the moment of completion of "the deadline for submission of tenders." A tender with validity period shorter than the specified deadline will be rejected by the Tender Evaluation Commission as inadmissible.

In exceptional circumstances, the Contracting Authority may solicit the tenderer's consent to an extension of the Tender Validity Period. The request and responses thereto shall be made in writing. If a tenderer agrees to extend the period of validity, the Tender Security shall also be extended, if required, according to paragraph 3.2.2.

3.5. Format and signing of the Tender

3.5.1 Every tenderer should prepare and submit the tender on the website of the Public Procurement Agency (PPA). Detailed information regarding the loading of tender shall be available in the user manual, which is published at the web <https://www.app.gov.al>.

3.5.2 Tenderer, who will be the winner of the competition, will submit to the Contracting Authority the original tender. The original Tender shall be typed, printed or written in indelible ink. The person or persons who have the right to affix their signature (authorized by power of attorney submitted as part of the Technical Proposal), in accordance with paragraph 3.3, should do the following:

- i) They should affix their signature in the original tender; and
- ii) They should write their initials on each page of the original documents accompanying the economic tender.

3.5.2 No changes, deletions or additions shall be made in the tender, except in cases where corrections shall be signed by the person or persons entitled to sign the tender. Original tender shall be identical with the tender loaded on the website of PPA.

4. SUBMISSION OF TENDERS

4.1. Format and Signing of the tender

4.1.1. Pursuant to the Decision of the Council of Ministers no. 268, dated 18.04.2012 "On the electronic performance of tendering procedures Concession / Public Private Partnership" and DCM no 575, dated 10.7.2013 "On approval of rules for the evaluation and granting on concession/public private partnership", the tender shall be submitted in electronic format in accordance with the instructions of the Public Procurement Agency. For detailed information about this procedure please visit the official website www.app.gov.al.

4.1.2. Contracting Authority accepts no responsibility to any tenderer against any claim or complaint on the uncertainty in the manner of submission of the Tender except when an application is not secured properly due to lack of proper infrastructure upgraded by the Contracting Authority.

4.1.3. In any case, tenderers shall submit **electronically** all mandatory and necessary documentation for the presentation of their Tender.

4.1.4. Successful Tenderer shall submit the original tender to the Contracting Authority. Original tender should be placed in an envelope / box and should be duly closed and sealed. On the envelope / box should be written the name and address of tenderer and the note: Tender for the project "_____".

Original tender must be submitted to the following address:

To:	(Contracting Authority)
-----	-------------------------

Attn: Tender Evaluation Commission

Address:

4.2. Deadline for submission of tenders

4.2.1. Tenders shall be submitted on the website of the Contracting Authority no later than _____, at _____. Successful Tenderer shall be notified in writing by the Contracting Authority for the deadline of the original tender submission.

5. Tender opening and evaluation

5.1. Opening of tenders

5.1.1. Tender Evaluation Committee identifies tenderers and opens tenders submitted on the website of APP after the expiration of deadline for submission of tenders.

5.2. Evaluation of Tenders

5.2.1. Following the opening of the tender, Tender Evaluation Committee shall review the tender to determine whether it is acceptable, the required documentation is submitted, the documentation required to be signed by the tenderer is duly signed, and whether it is regular or not.

5.2.2. Evaluation of contracting authority will be based on the data and the content of the tender itself without addressing to other sources. However, if necessary, Tender Evaluation Committee may, at its discretion, ask Tenderers for clarifications, which do not constitute a change in the substance of the tender. Requests for clarification and the responses thereto shall only be in writing or/and reflected in the relevant records. Furthermore, in special cases, Contracting Authority reserves its right to include various experts who may help addressing those issues for which Tender Evaluation Committee faces difficulties dealing with.

5.2.3. Tender shall be deemed invalid if:

- i) tenderer has not submitted tender security, if required
- ii) tender contains false data
- iii) it did not meet one or all the requirements of the call for the competitive procedure.

5.2.4. Tender Evaluation Committee shall evaluate a tender to be valid even if it contains minor deviations, which do not materially alter or do not deviate from the characteristics, conditions and other requirements laid down in the selection procedure documents, or errors, which can be adjusted without affecting its contents.

5.2.5. If more than one Financial Proposal has the same value or the same scores, then the successful tenderer shall be determined by lot in the presence of tenderers.

- 5.2.6.** Tender Evaluation Committee shall draft the final classification, which should be made public and communicated to tenderers. Upon notification of the final classification, each tenderer may request an administrative review of the selection process, if finding that an action taken by the Contracting Authority and Tender Evaluation Committee is contrary to the provisions of Law No 125/2013 “On concessions and public private partnership” and the DCM no. 575, dated 07.10.2013 "On approval of the rules for the evaluation and concession / public private partnership", using the AppealForms,as defined in Appendix 21.
- 5.2.7.** Upon termination of the procedure for appeal, Tender Evaluation Committee shall prepare the final report of evaluating the tenders and shall propose the Chairman of the contracting authority the results achieved for each of the tenderers.

5.3 Invalidity and Failure of the Competitive Tendering Procedure

Competitive procedure is considered unsuccessful when:

- i) None of the tenders submitted meets the requirements of the invitation to tender (call for bids) procedure;
- ii) The contracting authority, for lack of economic viability of the tenders or the project itself, shall announce the closing of the competitive procedure;
- iii) Or when there is no participant in the competition;

5.4. Illegality

In compliance with the legislation on prevention of conflict of interest and ethics in public administration, the contracting authority shall reject a tender, if the tenderer who submitted it:

- i) has given or intends to give a current or former employee of the Contracting Authority a gift in cash or not, as an attempt to influence an action or a decision or the course of the tender; and / or
- ii) is in a conflict of interest in this procedure such as - a tenderer has connections with a natural or legal person, who is charged by the Contracting Authority to provide advisory services in project preparation, specifications or other documents regarding the competitive procedure or has connections with members of Tender Evaluation Committee;
- iii) has submitted documents / false information related to requirements outlined in the standard tender documents.

The contracting authority shall inform tenderer and the Public Procurement Agency for rejection of tender and the reasons thereof, and shall make the relevant note in the report for the competition procedure.

5.5. Determination of the Successful Tenderer and Contract negotiation and finalization

- 5.5.1.** Upon expiry of the appeal period referred to in Section 5.2.6. the Contracting Authority shall notify the Successful Tenderer,whose tender has received the

highest final score, sending him the Successful Tenderer Notification, as defined in Successful Tenderer Notification Form. A detailed copy of this notice shall be published in the Bulletin of Public Notices. During the signing, the Contracting Authority asks the Successful Tenderer to submit the Security Contract.

Security Contract Form should be signed and submitted according to paragraph 5.5.3

Contract Security should be submitted as:

- i) an unconditional bank guarantee; or
- ii) an insurance policy.

5.5.2 The Contracting Authority and the Successful Tenderer will discuss, negotiate and agree in good faith the final terms and conditions of the Concession Contract / Public Private Partnership, given that the Successful Tenderer shall be required to sign the concession contract under specific and general contract conditions signed by him in every page and submitted as part of the Technical Proposal, altered (if applicable) during the process of negotiating the Concession Contract / Public Private Partnership.

5.5.3 If within _____ days from the date of Successful Tenderer Notification and the deadline specified in the Decision of the Council of Ministers, it becomes clear that, if the Successful Tenderer (for unjustified reasons) will not submit Contract Security and / or will not sign Special and General Contract Terms and Conditions, the Contracting Authority shall be entitled to forfeit the Tender Security of the Successful Tenderer, if required, and will invite other Tenderers, according to the order in the final classification, and invite for negotiations the other Tenderers in the order of the final ranking until it receives the Contract Performance Security and the Special and General Contract Terms and Conditions and signs the Concession / PPP Contract on each page, or otherwise rejects all remaining Tenders.

5.5.4 The Contracting Authority shall publish in the Public Notification Bulletin the name of the Successful Tenderer within thirty (30) days after the signing of the Concession / PPP Contract.

Appendix 2

INVITATION TO TENDER¹

Tirana Municipality invites to submit tenders to perform the following:

The Municipality of Tirana or "**Contracting Authority**", invites Economic Operators in an international tender procedure to tender for the Public Private Partnership for the detailed design and execution of the construction of a new public transport terminal, maintenance as well as the subsequent management of the Tirana public transport terminal (hereinafter referred to as the "**Project**") in accordance with the procedures and criteria set forth in the tender documents and the terms of the contract. The estimated Project Value is EUR 15.477.857,31 (fifteen million four hundred seventy-seven thousand eight hundred fifty-seven point thirty-one), VAT excluded.

The Contracting Authority will apply the open tender procedure pursuant to Art. 22 of Albanian Concessions and Public Private Partnership Law no. 125/2013. The Contracting Authority will consider only the tenders of those Tenderers or consortia of Tenderers which have passed the minimum thresholds set out in the Qualification Criteria.

During the construction of the terminal, the objective of the Contracting Authority is to improve overall mobility by providing a full-capacity transport terminal to allow intercity coaches to unload passengers to urban buses and taxis along the city's principal corridor to the north, west and south part of the country, thereby reducing traffic congestion in the city centre, improving air pollution and reducing fuel consumption for public transport.

The Contracting Authority will offer an 85,000 square metre land plot situated along the main corridor leading north-westerly out of the city toward Durres to be contracted out on a long-term basis to the Successful Tenderer to build, operate and maintain the terminal for the benefit of operators and passengers. In exchange, all bus docking fees, retail rental revenues, and parking fees, will be collected by the Economic Operator to amortise its initial CAPEX, operational costs, and cover debt service.

Tendering for the contract is open to companies and joint ventures of companies from any country meeting the requirements and criteria envisaged as follows:

Location of performing the employment contract

Rr e Kastriotëve, Kthesa e Kamzës, Tirana

Duration of the contract or timeframe of its execution

The duration of the concession PPP contract will be the duration offered by the Successful Tenderer until 35 years).

Tenders shall be uploaded electronically to the Public Procurement Agency website www.app.gov.al before the date of its opening.

Date: 27/02/2017

Hour: 11:00

When tenders are required to be submitted electronically, the economic operators shall upload the tender electronically on the official website of PPA: www.app.gov.al.

¹This appendix is applicable to the restricted procedure and negotiated procedure with prior notice

Appendix 9

[Appendix to be completed by the Contracting Authority]

GENERAL ADMISSIBILITY/QUALIFICATION CRITERIA

The Tenderer shall submit:

1. A document proving that (your subject):
 - a. is not under a process of bankruptcy,
 - b. is not convicted of any criminal offences, in accordance with Article 45/1 of the PPL,
 - c. is not convicted by virtue of final court decision regarding the professional activity, issued by the National Registration Center.

The above requirements, are supplemented by the submission of the Extract of the Trade Register on the Data of the Entity, Historical Extract of the Entity issued by the National Registration Center, and the self declaration of the subject, according to Appendix 10 “Declaration on the legal status”

2. A document certifying that (your company):
 - a. has paid its fiscal dues,
 - b. has paid all social insurance obligations, issued by the Taxation Authority.

The general Admissibility Criteria shall not be changed by Contracting Authorities. These criteria (items 1, 2) shall be attested through documents issued not before three months from the application opening day.

2. The economic operator shall be registered in proper state professional or trade registers in which they have been constituted, by certifying their legal personality. For this purpose, the candidates shall submit a copy of the Historical Extract of the Entity issued by the National Registration Center.

A foreign Candidate/Tenderer shall certify that he complies with all requirements listed above. If the above mentioned documents are not issued in their country of origin, a written statement shall be sufficient. If documents are written in Albanian, then the documents written in a foreign language shall be accompanied with a notarized translation in Albanian.

In case of a group/consortium of economic operators, each member of the group shall submit the above-mentioned documents.

In addition, if the application is submitted by a group/consortium of economic operators, the following documents shall be submitted:

- a. The notarized agreement according to which the group/consortium of economic operators has been officially established;
- b. Special power of attorney

3. SPECIAL QUALIFICATION CRITERIA

1. In order to certify that the economic operators are qualified, the Tenderers shall submit:

- a. Tender Security, according to Appendix 3;
- b. Statement on the fulfilment of qualification criteria according to Appendix 5;
- c. Statement on the Conflict of Interests according to Appendix 6;
- d. Tender Application Form duly completed and signed, according to Appendix 1;
- e. Works Execution Evaluation Form according to Appendix 7;
- f. Statement of machine availability according to Appendix 8.

2. Candidate/Tenderer shall submit:

2.1 Legal capacity of economic operator

According to the general criteria of acceptance and qualification.

2.2 Financial and economic capacity

- a. Copies of audited or certified balance sheets for the last 5 (five) years (2011,2012,2013,2014,2015) submitted to the relevant authorities of Taxation confirmed by this authority as well as accompanied by the Act of expertise of the statutory auditor, shall be submitted to demonstrate the current soundness of the Tenderer's financial position and indicate its prospective long-term profitability;

- b. Copies of declaration of annual turnover for the last 5 (five) years (2011,2012,2013,2014,2015) issued by the relevant authority, average value of which shall be not less than the value of the project namely EUR 15,477,857.31 (fifteen million four hundred seventy-seven thousand eight hundred and fifty seven point thirty one), VAT excluded. (Perhaps here we should say something about the exchange);
- c. Certification for payment of local taxes provided by Local Government for 2016;
- d. In case of group/consortium of economic operators, each member of the group shall submit the certificate issued by the relevant authority in which it is registered by the NRC;
- e. The Tenderer shall demonstrate that it has access to, or has available, liquid assets, unencumbered real assets, lines of credit, and other financial means sufficient to meet the construction cash flow for the contract for a period of five months, estimated as not less than Euro 3,500,000 (three million five hundred thousand), taking into account the Tenderer's commitments for other contracts.

2.3 Technical capacity

Regarding the technical and professional capacity, the economic operator should meet the minimum requirements established by the Contracting Authority as follows:

Successful experience to accomplish at least:

a. Construction Experience

Successful experience in the execution of:

1. Similar work on a single object with the value of 40% of the estimated value of the project on building construction, namely with the value of EUR 2,600,000 (two million six hundred thousand), VAT excluded, realized the last five years, or
2. Similar work up to a limit where the total monetary value of completed works taken together is a value twice the estimated value of the project on building construction, namely with the value of EUR 12,000,000 (twelve million) VAT excluded, realized the last five years.

The tender shall be considered eligible if meets one of the two conditions described above.

Evaluation of the successful experience of the economic operator will be carried out based on the following statements and documents:

”For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal”

- a) For contracts to be concluded with public entities, the economic operator should submit the following documents:
1. Statement according to Appendix No. 7, accompanied by:
 2. Contract
 3. Final Progress Payment
 4. Act of commissioning
 5. Certificate of Receipt
- b) For contracts to be concluded with private entities, the economic operator should submit the following documents:
1. Statement according to Appendix No. 7, accompanied by:
 2. Contract
 3. Final Progress Payment
 4. Act of commissioning
 5. Certificate of Receipt
 6. Tax invoice for each work progress payment

Point 1 should be completed by the member who has the highest percentage of participation in the group (consortium). Other members of the group may submit similar contracts in proportion to the percentage of their participation in the group; whereas point 2 should be completed by all members of the union in proportion to the percentage of their participation in the group.

b. Road Works Experience

Successful experience in the execution of:

1. Similar work for a road infrastructure contract with the value of only 50% of the estimated value of the project on road infrastructure namely in the value of EUR 4,500,000 (four million five hundred thousand), VAT excluded, realized the last five years, or
2. Similar work up to a limit where the total monetary value of completed works taken together is a value twice the estimated value of the project on road infrastructure, namely in the value of EUR 18,000,000 (eighteen million) VAT excluded, realized the last five years.

The tender shall be considered eligible if meets one of the two conditions described above.

Evaluation of the successful experience of the economic operator will be carried out based on the following statements and documents:

- a) For contracts to be concluded with public entities, the economic operator should submit the following documents:
 - 1. Statement according to Appendix No. 7, accompanied by:
 - 2. Contract
 - 3. Final Progress Payment
 - 4. Act of commissioning
 - 5. Certificate of Receipt

- b) For contracts to be concluded with private entities, the economic operator should submit the following documents:
 - 1. Statement according to Appendix No. 7, accompanied by:
 - 2. Contract
 - 3. Final Progress Payment
 - 4. Act of commissioning
 - 5. Certificate of Receipt
 - 6. Tax invoice for each work progress payment

Point 3 should be completed by the member who has the highest percentage of participation in the group (consortium). Other members of the group may submit similar contracts in proportion to the percentage of their participation in the group; whereas point 4 should be completed by all members of the union in proportion to the percentage of their participation in the group.

c. Operational and Maintenance Experience

The Tenderer shall meet the following minimum criteria:

- (a) Operation with satisfactory results of a station of public transport bus station (terminal) of a type and complexity comparable to the proposed project, of a nature and complexity comparable to the proposed services, completed or ongoing as prime contractor, a joint venture member, management contractor or subcontractor, within the last five years.
 - 1. Services similar to the object of concession / public private partnership with the value of 40% of the estimated value of the services provided in the project, namely EUR 300,000 (three hundred thousand), VAT excluded, realized during the last five years.

To prove this the economic operator should submit the following:

- a) When the similar service is realized with public entities, the economic operator shall certify it by submitting the contract signed with the institution, necessarily accompanied with progress payments for services rendered and a certificate issued by the state institution for the execution of full and successful of this contract, where the length of service and the value of service realized shall be specified;
- b) When the similar service is realized with private entities, the economic operator shall certify it by submitting the contract signed with the institution, respective sales tax invoices (*where dates, amounts and services carried out shall be explicitly stated*)

d. Design Experience

The Tenderer or a specialised subcontractor shall meet the following minimum criteria:

- (a) average annual turnover as prime contractor, joint venture member, management contractor or subcontractor (defined as billing for engineering design services in progress and completed) over the last 5 (five) years of EUR500,000 (five hundred thousand);
- (b) successful experience as prime contractor, joint venture member, management contractor or subcontractor in the design of
 - at least one design project with a value of EUR300,000 (three hundred thousand), excluding VAT, realized during the last five years or
 - multiple design projects with a value of EUR600,000 (six hundred thousand), excluding VAT, realized during the last five years.

of a nature and complexity comparable to the proposed services that have been satisfactorily and completed as a prime contractor, joint venture member, management contractor or subcontractor within the last five years.

e. Experience in civil or road infrastructure works

Tenderer should have successful experience in the execution of:

”For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal”

1. Similar work for a single contract in civil or road infrastructure with a value of not less than 12,000,000 (twelve million), VAT excluded, realized the last five years or ongoing work;
2. Similar work up to a limit where the total monetary value of completed works taken together is a value of 24,000,000 (twenty-four million), VAT excluded, realized the last five years or ongoing work.

The tender shall be considered eligible if meets one of the two conditions described above.

Evaluation of the successful experience of the economic operator will be carried out based on the following statements and documents:

- c) For contracts to be concluded with public entities, the economic operator should submit the following documents:
 1. Statement according to Appendix No. 7, accompanied by:
 2. Contract
 3. Final Progress Payment
 4. Act of commissioning
 5. Certificate of Receipt
- d) For contracts to be concluded with private entities, the economic operator should submit the following documents:
 1. Statement according to Appendix No. 7, accompanied by:
 2. Contract
 3. Final Progress Payment
 4. Act of commissioning
 5. Certificate of Receipt
 6. Tax invoice for each work progress payment

Evaluation of the successful experience of the economic operator will be carried out based on the following statements and documents:

1. Contract
2. Tax invoices up to 30 days prior to the procedure development

”For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal”

3. Progress Payments up to 30 days prior to the procedure development
4. Certification by the investor for the realized value up to 30 days prior to the procedure development

2.4 Professional license regarding the execution of the contract

a. Company licenses valid for the following categories

NP-1D Soil Excavation works

NP-2F Civil and industrial constructions

NP-3C Reconstruction and maintenance of civil and industrial buildings, facade coatings

NP-4D Roads, highways, overpasses, railways

NS-1C Buildings demolition works

NS-2B Hydro-sanitary plants, kitchens, laundries, their maintenance

NS-3B Lifting and transporting plants (elevators, escalators, conveyors)

NS-4C Refinish masonry works and relating, wood, plastic, steel and glass materials refinish,
refinish of technical constructive nature

NS-5B Illuminated plants traffic signs

NS-6A Non-Illuminated Traffic Signs

NS-7B Traffic and safety barriers

NS-8A Prefabricated reinforced concrete, metal and wood structure constructions

NS-10B Special layer and over-structure

NS-12D Technological, heating and air conditioning installations

NS-13C Telephone and telecommunications lines systems installations

NS-14D Interior, electric, phone, TV radiotelegraphy etc installations

NS-19B Anti-noise systems for infrastructure projects

- according to the model issued by the Ministry of Public Works, Transport and Communications;

Foreign Tenderers shall appear at the Ministry of Public Works, Transport and Telecommunications to make the equivalence of their professional license issued by the authorities of their country of origin, as a supplement to professional licenses required for the execution of the contract.

"For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal"

3. Tenderer candidate should appoint through a statement (drafted by the administrator of the company) the Head Technician of construction works (technical director should have over 20 (twenty) years of work experience evidenced in the employment booklet (record book), included in the company license and declare that he/she shall be present during the construction works, accompanied by the following documentation:
 - i. Employment booklet
 - ii. Curriculum Vitae
 - iii. Valid employment contract
 - iv. Diploma
4. An average employment of at least 300 (three hundred) people, for the period January 2014 - December 2016 certified by:
 - 4.1. Certificate issued by Social Insurance or Taxation Authority, specifying the number of employees for each month; for the period January 2014 - December 2016
 - 4.2. Employee payroll according to the format required by the legislation in force for the period January 2014 - December 2016 accompanied with the declaration of payments forms for social and health insurance.
5. The following shall be part of the technical staff employed by economic operators participating, certified by valid employment contract, Diploma, CV and evidenced on the payroll for the period January 2015-December 2016:
 - Construction Engineer (4)
 - Surveying Engineer (2)
 - Electrical Engineer (1)
 - Electronic Engineer (3)
 - Mechanical Engineer (2)
 - Environmental Engineer (1)
 - Informatics Engineer (1)
 - Hydrotechnical Engineer (1)
- 5.1. At least 30 employees provided with technical security licences issued by the Central Technical Inspectorate should be part of the technical staff employed and shall be evidenced in payroll for the last six months, of these being at least:
 - Group I- 7 (seven) employees

"For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal"

- Group II - 10 (ten) employees
 - Group III - 9 (nine) employees
 - Group IV - 3 (three) employees
 - Group V - 1 (one) employee
 - (Respective technical security licences should be submitted for the abovementioned employees)
 - Economic Operator should employ a minimum of 7 (seven) employees of heavy vehicles maneuver, who shall submit valid employment contract and driving licenses issued by relevant institutions and they should be evidenced in payroll of the company.
- 5.2. Economic Operator should employ 1 (one) physician, who shall submit the Order of the Physicians, University Degree, Employment Booklet and Employment Agreement entered into between the Physician and the Economic Operator, valid for the period of construction, and he should be evidenced in payroll of the company for at least the past two years, namely from December 2014 until December 2016. In case of group/consortium of economic operators, at least the chair member of the group shall meet the requirement of having 1 physician in his company.
6. The company should submit the **ISO 9001- 2008** Certificate (Quality Management System) (valid).
 7. The company should submit the **ISO 14001-2004** Certificate (Environmental Management System) (valid).
 8. The company should submit the **OHSAS 18001-2007** Certificate (Occupational Health and Safety Management System) (valid).
 9. The company should submit the **PAS 99-2012** Certificate (Integrated Management System) (valid).
 10. The company should submit the **ISO 39001 -2012** Certificate (Road Traffic Safety Management System) (valid).
 11. The company should submit the **ISO 27001-2013** Certificate (Information Security Management System) (valid).
 12. The company should submit the **ISO SA 8000-2014** Certificate (Social Accountability Management System) (valid).
 13. The company should submit the **ISO 50001-2011** Certificate (Energy Management System) (valid).

”For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal”

14. The company should submit the **ISO EN 3843-2-2006** Certificate (Welding Process Quality Management System) (valid).
15. Company should submit Licence III. 2.A (1 + 2) Expertise and/or professional services regarding environmental impact.
16. License III. 7.A. Expertise and/or professional services regarding designing, professional services for applications.
17. License III. 1.A. Simple Environmental Permit, Type C. Car repair service.
18. Technical Equipment license available or become available to economic operator, required for execution of the contract (Appendix 8)

<i>Vehicles</i>	<i>Qty</i>	<i>Status</i>

Appendix 11

[Appendix to be completed by the Contracting Authority]

EVALUATION CRITERIA

Tenders shall be evaluated according to the following criteria, and the Successful Tenderer shall be deemed the one who has the maximum number of scores based on the evaluation criteria.

Tender Assessment Committee shall evaluate technical and financial tenders, based on the following criteria:

No.	Criteria	Max Score	Min Threshold/ Passing Score
TC1	Compliance with Minimum Technical Requirements	2	1
TC2	Technical and operational soundness	34	20
TC3	Information systems	4	2
TC4	Environmental and Social Acceptability	10	
TC4-1	- internal security of the area and the buildings	4	
TC4-2	- innovative techniques in the field of energy saving and compliance with environmental standards	4	
TC4-3	- reduction of impact on local traffic during the construction activities	2	
	TOTAL TECHNICAL CRITERIA	50	
FC1	DURATION OF CONCESSION	10	
FC2	CONCESSION FEE	10	
FC3	TERMINAL CHARGES	10	
FC4	PROFIT SHARING	10	
	TOTAL FINANCIAL CRITERIA	40	
CTC1	CONSTRUCTION TIME	10	

	<i>TOTAL</i>	100	
--	---------------------	------------	--

TECHNICAL CRITERIA

The technical evaluation criteria, including the scores and minimum thresholds/ passing scores (where appropriate) are described below. The evaluation will be performed by the Evaluation Committee, eventually assisted by specific experts for key areas, and will take into consideration the elements described below.

TC1: Compliance with Minimum Technical Requirements - 2 points (minimum threshold/passing score – 1 point).

Every Tenderer has to respect the minimum technical constraints set forth in the ***Minimum Technical Requirements*** (Error! Reference source not found.Error! Reference source not found.). The main concept to be retained is that those proposals which do not comply with these basic requirements will be disqualified.

TC2: Technical and operational soundness - 34 points (minimum threshold/ passing score - 20 points).

The Technical and operational soundness will be evaluated on the base of the Project Design, the Business Plan, the Implementation Schedule and the Quality of services and measures to ensure their continuity.

Project Design – suitability of the project arrangement and its features, quality of the Preliminary Design Report, quality criteria to be applied.

The Project Design shall contain a ***Preliminary Design Report*** and a ***Report on Operational Efficiency***;

The **Preliminary Design Report** shall give an overall technical description of the construction and the installations and include details on:

- Description and specification of the materials that will be used for the finishing of the buildings and the areas of the terminal.
- Installations to increase the comfort of the travellers like escalators and elevators;
- Information systems proposed, for example for payments, computerized number plate recognition systems, systems to assign incoming vehicles to achieve better stall utilisation, systems to monitor traffic flows and stall occupancy;
- Techniques and innovative solutions for the lighting system (both ordinary and for emergency) will be evaluated on the basis of their technical robustness, the completeness of

the coverage proposed within the terminal, their energy consumption, the increase of the level of safety with regard to emergency lighting, the implementation of backup solutions, solutions anti-panic in high-risk areas.

The **Report on Operational Efficiency** shall give an overall description of the operations and include details on:

- Payment mechanism and proposals on the integration of billing of tickets for various services;
- Contents of the Monthly Operational Reports that will be delivered to the MoT;

Business plan – Cost and Revenue Analysis and Estimate of Recurring Costs including an Investment Plan, Profit & Loss statement, Cash Flow statement and sensitivity analysis.

Implementation Schedule – Time allowed for field investigations, detailed project design, execution of the construction including manufacture, delivery and installation of technical facilities. The length of the construction period and the time to the start of the operation of the terminal must be in line with the period offered in the financial tender.

Quality of services and measures to ensure their continuity - Tenderers shall submit their Major Maintenance and Specific Maintenance programs for the buildings and technical installations as well as other measures to ensure the good order of the facilities until the expiry of the concession period. The report on quality of services shall indicate their guaranteed availability and relative performance indicators;

TC3: Information systems - 4 points (minimum threshold/ passing score - 2 points).

The information systems for passengers on arrival and departure of busses and for users of the parking site about availability and access to parking will be evaluated on the basis of their technical robustness, the completeness of the information proposed, the diffusion of the information panels within the terminal and the availability of the information via internet.

TC4: Environmental and Social Acceptability - 10 points (no minimum threshold/ passing score).

The Environmental and Social Acceptability will be evaluated taking into consideration:

- internal security of the area and the buildings through a proposal that provides systems such as access control, cameras, possibility to use mobile phones at any place within the terminal, security services (number of persons, shifts), etc. (TC4-1 maximum score 4 points)
- innovative techniques in the field of energy saving and compliance with environmental standards (TC4-2 maximum score 4 points)

”For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal”

- proposal to reduce, during the construction activities, the involvement of ordinary roads and impact on local traffic (TC4-3 maximum score 2 points)

$$TC4_i = TC4-1_i + TC4-2_i + TC4-3_i$$

TC: Technical Score – maximum 50 points

$$TC_i = TC1_i + TC2_i + TC3_i + TC4_i$$

FINANCIAL CRITERIA

FC1: Duration of Concession Period – maximum 10 points

The score for the Duration of the Concession Period (maximum 35 years, minimum 15 years) is calculated as follows:

$$FC1_i = 10 \times CP_{\min}/CP_i$$

where:

$FC1_i$ = Total Concession Period Points for proposal (i)

CP_i = Concession Period in proposal (i) (months)

CP_{\min} = Minimum Concession Period in all proposals (months)

Where the Concession Period offered by Tenderer i is inferior to 180 months (15 years), CP_i will be put equal to 180 and consequently also CP_{\min} is equal to 180.

Where the Concession Period offered exceeds 420 months (35 years), the tender will be excluded as non responsive.

Concession Period has the meaning stipulated in Article 2.2(a) of the Draft Concession / PPP Contract.

FC2: Concession Fee – maximum 10 points

Every year during the Operational Phase, the Concessionaire shall free of charge provide the Contracting Authority with at least one percent (1%) of the gross annual revenue, in a manner detailed in Clause 16.1 of the Draft Concession / PPP Contract (the "Concession Fee").

The Tenderers shall provide their offer equal, or above this percentage of 1% of the gross annual revenue.

”For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal”

$$FC2_i = 10 \times [(CF_i - 1\%) / (CF_{\max} - 1\%)]$$

where:

$FC2_i$ = the Concession Fee Score for Tenderer (i)

CF_i = the Concession Fee proposed by Tenderer (i) (in %)

CF_{\max} = the highest Concession Fee offered among all tenders (in %)

FC3: Terminal Charges – maximum 10 points

According to paragraph 15.1 of the Draft Concession / PPP Contract, the Private Partner shall be entitled to levy the Terminal Charges to the Terminal Users and to retain the Terminal Charges during the Concession Period in accordance with Schedule 3 (*Terminal Charges*) of the Draft Concession / PPP Contract.

The Tenderer is asked to offer a single discount to be applied to all the terminal charges given in Schedule 3 (*Terminal Charges*) of the Draft Concession / PPP Contract.

$$FC3_i = 10 \times CH_i / CH_{\max}$$

where:

$FC3_i$ = the Terminal Charges Score for Tenderer (i)

CH_i = the discount on Terminal Charges proposed by Tenderer (i) (in %)

CH_{\max} = the highest discount on Terminal Charges offered among all tenderers (in %)

FC4: Profit Sharing – maximum 10 points

The Private Partner shall provide the Contracting Authority a percentage of the gross annual revenue.

The Tenderers shall provide this percentage of profit sharing on the gross annual revenue as specified in Clause 13.3 of the Draft Concession / PPP Contract.

$$FC4_i = 10 \times [PS_i / PS_{\max}]$$

where:

$FC4_i$ = the Profit Sharing Score for Tenderer (i)

PS_i = the Profit Sharing proposed by Tenderer (i) (in %)

PS_{\max} = the highest Profit Sharing offered among all tenders (in %)

”For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal”

FC: Financial Score – maximum 40 points

$$FC_i = FC1_i + FC2_i + FC3_i + FC4_i$$

CONSTRUCTION TIME

CTC1: Construction Time – maximum 10 points

Tenderers are required to indicate the Construction Time (in days) needed from the “Effective Date” of the Draft Concession / PPP Contract (as defined in Clause 3.5 of the Draft Concession / PPP Contract, to the “Terminal Opening Date”, where the Terminal Opening Date means the date on which the Terminal is opened for the Terminal Users with all applicable operating facilities in compliance with the Concession / PPP Contract.

$$CTC_i = 10 \times CT_{\min}/CT_i$$

Where:

CTC_i = Total Points for the Construction Time (i)

CT_i = Construction Time in proposal (i) (days)

CT_{\min} = Lowest Construction Time in all proposals (days)

"For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal"

OVERALL EVALUATION

$$\text{Total Score}_i = \text{TC}_i + \text{FC}_i + \text{CTC}_i$$

Appendix 12

[Appendix to be submitted by the foreign economic operator]

Self-Declarations for Foreign Tenderers

For participation in the procedure of obtaining the concession / PPP of "..."

For:

[Date]

[Tenderer's name/Lead member of Temporary Union] declare and guarantee that, at the date of this letter [Tenderer's name/Lead member of Temporary Union] and each member of the Temporary Union (where applicable)

- (a) is not a subject to bankruptcy or liquidation proceedings;
- (b) is not convicted of a criminal offense;
- (c) is not convicted by the final court, related to professional activity;
- (d) capitals/assets are not assessed by the Enforcement Office or there is an order of seizure;
- (e) has completed all fiscal obligations;
- (f) has fulfilled all the obligations of social insurance.

Respectfully,

Signature of Authorized Person

Name and Position of Signatories

Tenderer's name/Head of Temporary Union

Appendix 13

(Appendix to be submitted by the contracting authority)

PROJECT IMPLEMENTATION AND TECHNICAL SPECIFICATIONS

MINIMUM TECHNICAL REQUIREMENTS

1. Introduction

The Design of the Terminal must develop the Project Description, with reference to **Solution 3**, and must guarantee the Terminal full functionality, through the construction and the activation of the following buildings and facilities only:

- a) Terminal access with roundabout on SH1 (Rruga Kastrioti);
- b) Terminal Circulatory Roads with kiss and ride;
- c) Bus, taxi-van and taxi parking;
- d) Travellers’ buildings;
- e) Footbridges;
- f) Bus Garage and fuel service station;
- g) Public space;
- h) Environmental mitigation.

A complete list of all uses provided in previous buildings is given on the Task 4 of the Project Description, referring to buildings’ dimensions and functions, which shall be confirmed by Concessionaire in Terminal design.

2. General design criteria

The Design of the Terminal must develop the Project Description, with particular reference to Task 4, and confirm project concept, project horizontal planning, functional organization, dimensioning, functional mix and surfaces, vehicle accessibility, plano-altimetric arrangement of services, pedestrian pathways and vehicle tracks.

The design of the Terminal must meet the national codes and/or regulations and European codes, also according to international standards, in particular for people with reduced

mobility (2008/164/EC: Commission Decision of 21 December 2007 concerning the technical specification of interoperability relating to persons with reduced mobility in the trans-European conventional and high-speed rail system, notified under document C(2007) 6633).

The Concessionaire must ensure the possibility to create a new access road to Terminal.

3. Design Criteria for Travellers’ buildings, Footbridges

The type and the dimensioning of several buildings’ elements (stairs and handrails, ramps, escalators, lifts, obstacle-free route, doors and entrances, toilets, geometry of footbridges, emergency exits, visual information as signposting, pictograms and dynamic information, lighting, floor surfaces, parking facilities for PRM, transparent obstacles, etc.) shall have to meet the European codes (2008/164/EC).

The positions and sizes of the buildings shall be those represented in the Project Description - Task 4.

3.1 Structural issues

The structural design of the whole Terminal must meet the instructions of European Codes and local codes as well, both of which are aimed to be reference standards.

In addition, the structural design must meet the size and shape requirements, defined by the architectural concept.

Therefore, using a steel structure provides a larger space and higher adaptability regarding the walls and roof cladding.

Furthermore, the speed of construction, predictable maintenance costs along with lower weights and constructions depth are valuable reasons why the steel frame is the most suitable solution.

Therefore building floors and footbridge decks should be made of composite steel beams and reinforced concrete slab, while foundations should be made of concrete.

Protective treatment systems should be applied to structural steel frameworks using a combination of painting, metal spraying or galvanising, depending on the environmental conditions and easement of future maintenance.

Design measures such as seismic, thermal and fire measures should be considered with specific focus, particularly in the structural design of buildings.

Regarding the earthquake resistance, the predicted seismic action is expressed in terms of a reference probability of exceeding the P_{NCR} , in a certain reference period (related to the lifetime of the structure), a reference return period, T_{NCR} , and the importance factor γ_I (considering the reliability differentiation). The recommended values must be at least $P_{NCR} = 10\%$ and $T_{NCR} = 949$ years.

Moreover, the whole terminal should be divided into dynamically independent units by placing structural joints. Consequently, according to the EuroCode 8, only one foundation type should be generally used for the same structure, unless the structure consists of dynamically independent units.

Finally, the type and the dimensioning of construction shall be influenced by the results of geological surveys, and both seismic and geotechnical characterization of soils shall be performed by the Concessionaire in the project area.

To sum up, the structural system must include foundation in reinforced concrete and steel frame structures. Designed loads for floors and roofs must be dictated by local codes along with Euro Codes.

3.2 Exterior Finishes

The design of exterior finishes must meet the national codes and/or regulations. The exterior finishes must be highly energetically efficient and provide low maintenance costs by using only materials that do not require work at less than eight year cycles. All materials shall be selected considering factors such as price, maintenance, flexibility and acoustic properties, durability and adaptation to purpose. Locally available materials should be used for specific design features as far as possible.

The Concessionaire shall use the following exterior finishes:

- Metal roofs (aluminium roofing sheet with thermal insulation);
- Metal walls (aluminium facing sheet with thermal insulation);
- Full-length windows (extruded aluminium profile for transoms, aluminium decorative frames, double glazed unit, low-emissivity glass).

Windows and doors must be made of high quality commercial facade elements (aluminium, steel). Metal panels must be kept away from the grade line to prevent corrosion and rot.

In order to minimize solar heat input, shelters on the windows shall help to reduce air conditioning (thermal divided aluminium profiles, double glazed unit, low-emissivity glass).

Window panes, glass windows and handrailings must be safety glasses and must comply with UNI EN ISO 12543-2.

The public space should be paved with outdoor concrete floor or with stone floors and stone curbs. The floor surfaces should have anti-slip characteristics, according to national and European codes and regulations.

3.3 Interior Finishes

Public and employee spaces should be constructed of hard durable surfaces that reduce maintenance level, resist the vandal attacks, and still maintain an attractive appearance.

The Concessionaire uses the following interior finishes or others with the same performance and appearance:

- stone floors (entrance areas, stairs, public corridors, waiting areas);
- fine porcelain stoneware tiles floors (offices, ticket offices, technical rooms, dressing room);
- fine porcelain stoneware tiles coating (dressing room);
- stainless steel and glass shop windows;
- plastered and painted walls (office, ticket office, technical rooms, dressing room);
- stone claddings (entrance areas, stairs);
- aluminium sheets ceilings;
- fire doors (when included in the fire control plan);
- aluminium doors.

In public areas as well as in non-public areas, ceilings must meet building code requirements or regulations. When hanged ceilings are used, access to the ceiling space must be provided.

If gypsum wallboard is used, it should be backed up with steel frame to prevent puncturing. In the dressing rooms, divisions must be built with masonry work.

4. Design Criteria for Bus Garage

4.1 Structural issues

See paragraph 0.

4.2 Exterior Finishes

The design of exterior finishes must meet the national codes and/or regulations. The exterior finishes must be highly energetically efficient and provide low maintenance costs by using only materials that do not require work at less than eight year cycles. All materials shall be selected considering factors such as price, maintenance, flexibility and acoustic properties, durability and adaptation to purpose. Locally available materials should be used for specific design features as far as possible.

The Concessionaire shall use the following exterior finishes:

- Metal roofs (aluminium roofing sheet with thermal insulation);
- Metal walls (aluminium facing sheet with thermal insulation);
- Full-length windows (extruded aluminium profile for transoms, aluminium decorative frames, double glazed unit, low-emissivity glass).

Windows and doors must be made of high quality commercial facade elements (aluminium, steel). Metal panels must be kept away from the grade line to prevent corrosion and rot.

In order to minimize solar heat input, shelters on the windows shall help to reduce air conditioning (thermal divided aluminium profiles, double glazed unit, low-emissivity glass).

Window panes, glass windows and handrailings must be safety glasses and must comply with UNI EN ISO 12543-2.

4.3 Interior Finishes

The Concessionaire shall use the following interior finishes or others with the same performances and appearance:

- plastered and painted walls,
- industrial concrete floor.

5. Mechanical Equipment

5.1 Heating, ventilating, and air conditioning

Heating, ventilating, and air conditioning (HVAC) systems must be highly energetically efficient, provide low cost operation, and be easily maintained.

The design of HVAC system shall be dictated by local codes and/or regulations and international standards (NFPA) and technical standards (ASHRAE) of reference.

The interior temperature shall be adjusted according to the external temperature and the need to maintain proper working conditions for all staff working in indoor areas and comfort of all categories of passenger. The HVAC system must be equipped with regulation system zones.

Ventilation can be provided by ensuring the its conduction to the primary air treatment device. In food preparation areas, bringing enough mixed air shall be necessary in order to cover the replacement of the exhaust air. Dressing roomsshall require independent exhaust air systems.

An integrated building management system shall be provided to control the New Terminal's mechanical systems performance.

5.2 Plumbing Works

The sanitary areas shall be equipped by the Concessionaire with wall-mounted WC, urinals, wash basins and appropriate accessories according to international standards, in particular to people with reduced mobility.

Supply of drinking water for hydraulic installations and consumersshall be provided by the Concessionaire through a water distribution network in the building.Hot water shall be provided by gas boilers or alternatively with non-central electrical heaters.

An internal wastewater system of the buildings shall be installed by the concessionaire to ensure that wastewater can be drained directly into the outer line of wastewater.

5.3 Fire protection / Sprinkler irrigation system

The Terminal building, as a special type of building, leads to special fire protection requirements. Therefore, an adequate number of items of firefighting equipment shall be provided by the Concessionaire in the Terminal. The Terminal shall be equipped by the Concessionaire with a sprinkler protection system.

An adequate number of wall-mounted hydrants and firefighting equipment items shall be installed by the Concessionaire in the Terminal, located in visually clear and signed areas.

The Concessionaire shall provide a mechanical smoke extraction system in the Terminal.

Fire protection systems meet requirements of International Standard NFPA and local technical rules.

Water fire extinguishing system is essentially made up of central pressure groups with fire pumps and related water reserve, main pipes and junction, dispensing terminals with hoses and spouts, shut-off systems and accessories for clamping pipes.

5.4 Elevators and escalators

Power plants are provided for ascending and descending transport (elevators, escalators and moving walkways) to serve the Terminal, in number and size according to the number of people hosted.

Elevators meet the standards required by the European Standard UNI EN 81-1 and 2 about safety rules for construction and installation of electric and hydraulic lifts.

Escalators and moving walkways for public service meet the standards required by the European Standard EN 115 about safety of escalators and moving walkways.

6. Power supply

The Concessionaire will make possible the provision of reliable electric power supply for the Terminal, the operations centre and all equipment for Terminal and office accommodation.

The Concessionaire shall ensure that the stand-by power systems have the proper size to supply the Terminal during times of primary power loss. The stand-by system shall be

designed to provide additional emergency power for lighting of public areas, fire fighting units and other essential ambient and facilities for the safe operation of the Terminal.

7. Electrical Supply

The Terminal shall be supplied with a high voltage ("HV") delivery and transformation substation for low voltage ("LV") power supply (0.4 kV, 3p+Neutral wire, distribution with TN-S).

The high voltage ("MV") power supply shall comply with the description of external electrical networks.

8. Indoor and outdoor lighting

Lighting levels are shown in following table (standard AREMA). These values should be adjusted with regard to national conditions, codes, and/or regulations.

A high energetically efficient source shall be used for lighting devices. If ceiling heights are less than 3.5 m, fluorescent lamps or LED lamp should be used. If ceiling heights exceed 3.5 m, colour corrected HID lamps should be used.

Waiting Areas	269 lux
Dressing Rooms	323 lux
Ticket Sales	1.076 lux
Central Ticket Office	1.076 lux
Corridors	215 lux
Stairways and Elevators	215 lux
Staff and Dressing Rooms	215 lux
Public and Employee Lounges	215 lux
Garage and tramway parking places	538 lux

The Concessionaire shall provide suitable lighting in the Terminal, in order to make the use of such terminal pleasant and visually comfortable for passengers.

The Concessionaire shall provide orientation devices to help the terminal users recognise destinations and the paths towards entrances and exits and specific facilities. Orientation help

shall be provided by an easily understandable and recognisable system of different light temperatures used to highlight the above mentioned specific areas.

From the accessible building entrance to the platform access point, the obstacle-free route shall be lighted with a minimum lighting level of 100 lux, measured at floor level, within the Terminal borders. The minimum required light level on the main entrance, stairs, and at the end of ramps, must be 100 lux measured at floor level. If artificial lighting is required to achieve this aim, the required lighting level must be minimally 40 lux above the ambient surrounding light levels and have a colder colour temperature.

Platform and other external passenger areas must have a minimum average lighting level of 20 lux measured at floor level, with a minimum value of 10 lux.

If artificial lighting is required to provide the reading of detailed information, these locations must be highlighted by lighting with a minimal increase of 15 lux over that provided in surrounding areas. Such increased lighting must also have a different colour temperature to that in the surrounding areas.

Emergency lighting must meet the European or National Rules.

8.1 Roads Lighting

Lighting design of the roads inside the Terminal must guarantee the minimum requirements defined by the Standard UNI 10439:2001 - Technological requirements of street lighting for vehicle traffic (class I E, District urban roads).

Class 1	Type of street and territorial area	Lighting category index
E	District urban roads	4

Lighting category index	Minimum value of the average maintained luminance	Minimum uniformity		Debilitating luminance index
		U_{0.1}	U₁₂	
				TI 3)

"For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal"

	L_m			
	cd/sq. m.	%	%	
4	1,0	40	50	10

- i. $U_0 = L_{min}/L_{avg}$ ratio between minimum and average luminance for the full length of the roadway
- ii. $U_1 = L_{min}/L_{avg}$ ratio between minimum and maximum luminance along the centre line of each lane
- iii. TI = debilitating luminance index

Street lighting shall be provided by the Concessionaire for:

1. the Terminal Roundabout, as specified in the Project Description,
2. the Terminal circulatory road.

For such street lighting, the typical lighters for external installation must not be of lesser power, height and frequency than the following.

a) Terminal roundabout:

- Pole 12 m high with four 400W High Pressure Sodium Projectors.

b) Terminal circulatory road:

- Street artificial lighters and pole 300 W, 10 m high and 50 m spacing

c) Parking lots:

- Street artificial lighters and pole 300 W, 10 m high and 50 m spacing

These installations / lighting equipment must be provided for every two-lane road, as defined, on one side of the road only.

9. Telephonesystems /Intercom

A telephone/intercom system shall be provided for the Terminal. The private branch power station for the entire Terminal may be located in the Terminal.

10. Data and special systems

A structured cable network shall be provided for the Terminal, starting from the central communications MDB inside the office area of the terminal. The central equipment of the following systems shall be located in the main communication area and shall be distributed via the structured cable network, where applicable. All necessary active system components, such as server, router, hubs, bridges and other similar components shall be provided.

11. Security systems

Closed Circuit Television (CCTV) cameras and monitors for indoor and outdoor use and a building automation system (BAS) must be provided and kept operational 24 hours per day, inside a control room, for surveillance purposes.

12. Signage systems

There shall be a signage system for the travellers consisting of one information booth for each bus parking place (two text lines that indicate timetable, parking place number and destination) and two mega screens (100 inches), with characters 5 cm high and visible up to 30 meters, with 60 lines, inside the Terminal.

13. Bus information systems

Public address systems should be provided to make announcements of bus arrivals and departures. Speakers should be low power types, closely spaced to reduce reverberation. The microphone locations should be at the ticket office, information office and in the boarding areas. If a large number of platforms is built, the zonal division of the PA's system to enable targeted announcements should be considered.

The display of bus arrival and departure information should be accomplished using annunciation boards or video display units (CRTs).

14 Public services

14.1 Water Supply

The Concessionaire is responsible for providing water supply to meet the demands in Terminal.

The Concessionaire shall provide sufficient supply of drinking water for terminal and office premises, as well as the delivery and storage of drinking water and sufficient water for fire-fighting measures, fire brigade and watering.

14.2 Water Supply System

New wells shall be drilled on the Terminal site by the Concessionaire so as to provide enough water for the increasing demand of passengers, visitors and catering.

Water supply for the fire brigades shall be provided by a water reservoir which shall be as large as necessary during the Concession Period, considering the traffic levels and vehicles using the Terminal.

14.3 Drinking Water System

The drinking water supply provided by the Concessionaire shall be able to cover the total demand of the Terminal.

A water supply booster pump station should include (but not be limited to) a reservoir with clean water to balance the demand cover, a control room (including a monitoring room) and all the required mechanical and electrical equipment for operation of the pressure adjustment with backup materials for system duplication. A generator, as secondary power supply system with sufficient capacity for the water supply booster pump station shall be installed.

14.4 Wastewater

The Concessionaire shall provide, operate and keep maintained during the Concession Period a wastewater treatment plant at the Terminal, to treat all wastewater before it is discharged into local wastewater network, during the Concession Period.

There shall be a rainfall drainage system under the square of the terminal, which shall deliver water underground or accumulate it before being discharged into the local network of wastewater with adjustable flow.

The wastewater treatment plant shall meet the Applicable Laws and shall be of an adequate capacity for the maximum design capacity of the Terminal.

14.5 Wastewater System

The wastewater system shall be established by the Concessionaire as a complete, separated system for waste water without connections to surface water drainage.

Such wastewater system shall collect the waste water of the Terminal. All Terminal facilities shall be connected to the system. The collected waste water shall then be drained off to the Terminal wastewater treatment plant provided by the Concessionaire.

14.6 Terminal Wastewater Treatment Plant

The wastewater treatment plant provided by the Concessionaire shall treat the wastewater of the Terminal, in general, without connections to surface water drainage.

14.7 Telecommunications

The Concessionaire is responsible for the installation of appropriate telecommunication and IT-systems within the Concession Area, to meet the needs of the Terminal.

15 Design Criteria for Terminal roundabout, Terminal Circulatory Roads and Bus Parking

15.1 Sidewalk Structure Design Criteria

The sidewalk should be designed using international standards and guidance, to guarantee stability throughout the State and provide a sidewalk structure that shall have adequate strength, crossing quality and stability to keep the projected traffic loads for the duration of the design.

The final sidewalk structure should be based on a full analysis of specific project conditions including substrate soils and structural materials, environmental conditions, projected traffic, cost effectiveness, and the performance of other sidewalks in the same area or similar climatic and traffic conditions.

Therefore, as a recommendation, sidewalk structure layers of roads and parking spaces should be designed by following the AASHTO "Guide for Design of Sidewalk Structures", which shall be considered as a reference guide.

In particular, regarding to the input data of the AASHTO empirical - statistical design method, PSI_i (Initial Serviceability Index) should be taken equal to 4.2 and PSI_t (Terminal Serviceability Index) equal to 2.5, with a reliability $R=90\%$ at least.

In addition, the Concessionaire should calculate the design ESALs (equivalent standard axle loads) by considering those daily traffic volumes estimated in the paragraph 5.1 of the Project Description - Task 4 and also by considering at least 20 year duration of the sidewalk design.

However, for what concerns a flexible sidewalk, the structural layer features, such as material properties and thickness, should at least meet the following minimum standards listed below from the top to the bottom:

- Wearing layer (also known as surface-layer) made of 4cm asphalt concrete;
- Binding layer (also known as base-layer) made of 8cm asphalt concrete;
- Base (also known as road-base) made of 10cm asphalt concrete;
- Sub-base layer made of 25cm stabilized and compacted concrete materials;
- Intermediate layer made of 20cm unbound sand and gravel.

15.2 Dimension and geometry of the Roundabout, Circulatory Roads and Bus Parking

The Concessionaire must design the Roundabout and the Circulatory Roads of the Terminal according to the Project Description - Task 4.

The Concessionaire must define the size of the bus parking area according to the Project Description - Task 4.

15.3 Parking areas

The Concessionaire shall provide a rainfall drainage system in the parking areas, which shall disperse the water in the underground or shall accumulate it. The water, before being discharged in the local wastewater network with adjustable flow, shall be treated through an oil separator.

15.4 Platforms

Dimensioning: the size of the platforms must be designed in accordance with the Project Description - Task 4.

Finishes: the platforms shall be paved in asphalt with concrete curbs.

15.5 Platform roofs

For structural issues see paragraph 3.1. The structural system of the Platform roofs shall include foundation in reinforced concrete and steel frame structures.

Finishes: the roofs shall be made in metal (aluminium roofing sheet with thermal insulation).

15.6 Automatic Access Control

The Concessionaire shall provide an automatic access control which has two gates, one entrance and one exit from the terminal, consisting minimally of: 2 columns, 2 barriers, 4 electromagnetic coils, one cash machine, 1 "full" panel, as well as the devices (hardware and software) for the management of the equipment.

16 Fire and Rescue respective audits

16.1 Fire and Rescue Facilities

The Concessionaire shall provide fire and rescue equipment/services in full accordance with the respective standards.

The Concessionaire shall design, provide and maintain the firefighting equipment for the firefighting services of the Terminal.

The Concessionaire shall design an Emergency and Evacuation Plan.

16.2 Security service of firefighters

The Concessionaire shall provide a room for the security service of firefighters (control room).

16.3 Fire and Rescue Audits

The Concessionaire shall ensure that the security and security officer shall perform regular audits of the firefighting services at the Terminal, while the results of such audits shall be given to the respective State Entity, on request.

The Concessionaire shall upgrade the Terminal's emergency procedures at anytime, ensuring the sufficiency of fire exits and signage following the appropriate assessment of such procedures.

17 Terminal Safety Management Systems

The Concessionaire should prepare the Terminal safety management system that must include the following items:

- Safety documentation relating internal safety procedures.

- Data gathering and reporting system relating to all safety aspects
- Evaluation of Terminal data and determination of trends.
- Recommended safety actions
- Legislation for professional safety and health law according to EU directives.

The Concessionaire shall ensure that all Terminal Users comply with the specified safety requirements.

All Terminal Users shall be required by the Concessionaire to comply with the safety requirements.

The Terminal safety management system shall be under annual reviews and updates by the Concessionaire to ensure the accordance with national and international standards and practices.

18. Terminal Maintenance

The Concessionaire may outsource the routine and corrective maintenance activities to a third party organisation. The Concessionaire shall ensure that the following standards are achieved with respect to both types of maintenance detailed below:

4. Planned preventative maintenance

The Concessionaire should establish the planned maintenance intervals based on the recommendations and standards specified by the individual manufacturers to ensure the required system availability and reliability. If possible, planned maintenance should be operated during non-operational or low traffic periods in order to minimize the impact on the Terminal operations.

5. Corrective and emergency maintenance

For those systems that are characterized as critical to the Terminal operation and have a response time of less than half an hour, the maintenance Contractor shall provide up to 24 hours coverage on site.

For the non-critical systems, with a response time of more than half an hour, the maintenance contractor shall provide up to 24 hours coverage but on an "on call" basis.

If possible, the average repair time should be two hours.

Keeping spare parts of equipment should be subject of review to ensure compliance with the above criteria.

18.1 Terminal inspections and maintenance

The inspection system shall ensure that all defects in the physical facilities provided are quickly reported and corrected when required, as well as any failures, service unavailability or obstructions that may affect the safety of Terminal and personnel.

19. Environmental Management

Environmental Management Plan (EMP) for projects development usually includes a logical framework within which identified negative environmental impacts can be mitigated and monitored.

The Concessionaire shall prepare the environmental management plan ("EMP") dealing with all the environmental issues, in different phases of project development within the Concession Area, and ensure compliance with such EMP, as follows:

1. Air Quality

- Undertake pre-construction monitoring of existing ambient air quality;
- Compile the Air Quality and Dust Management Plan, which should include all duties and responsibilities to minimize dust generation and reduce emissions from activities such as construction, transport and mobility;
- Guarantee that the assessment of technical conditions of vehicles, regarding the effect of air pollution emissions is an integral part of the process of technical inspection of the vehicles, disciplined by respective legislation;
- Guarantee that chemicals fuels, oils, chemicals and stores of other harmful substances shall be stored on a waterproof base protected by a seawall with a capacity equal to 110% of the storage capacity of the largest tank;
- Monitor ambient air quality at a continuously operating air quality monitoring station to measure ambient air concentrations and determine whether ambient air quality standards are being exceeded;
- Co-work with the municipal traffic authorities (Tirana Traffic Control Centre (TTCC)) to design and develop traffic management and other initiatives to encourage drivers to minimize emissions;
- Design the Fuel station, in strictly compliance with the Code for design and construction of automobile gasoline and gas filling station. The operation of the Fuel station should strictly meet the Safety requirements for Operation at Gas Stations; and
- Introduce an annual air quality monitoring program.

2. Water Quality

- Prepare and apply a protocol for handling construction materials;
- Effectively manage delivery and storage of construction materials, away from water bodies and areas where flow or discharges impacts can be at minimum;
- Guarantee separate collection and treatment of wastewater from construction workers, canteens, etc., and
- Guarantee the collection of water from the fuelling area and connect to oil-water separator. Oil absorbents and other necessary response equipment for any spills, should be installed.

3. Noise Reduction

- Compile a detailed Traffic Noise Study, during development of the detailed design to identify and predict traffic noise levels at sensitive receptors and determine the optimal noise reduction measures in accordance with respective standards;
- Set up a noise Monitoring Programme to measure construction noise levels at the closest sensitive receptors as work starts on each new section along the route;
- Guarantee that the construction equipment shall meet the Albanian and European standards on sound emission of equipment operated outdoors, when applicable and relevant;
- Guarantee the avoidance of noise-generating activities at night, and to operate only when essential and in accordance with a special permit obtained for this purpose from the respective authority;
- Guarantee temporary noise barriers at the appropriate places to reduce the noise impacts. These areas should include noisy stationary construction machines and/or areas with sensitive receptors, based on the on-site noise level monitoring results, and
- Communication with the residents living within the potentially impacted areas, and continuous consultations regarding their concerns, difficulties, and suggestions for noise control before the initiation of construction works during the night. These concerns shall be responded and suggestions shall be considered when appropriate.

4. Vibration Reduction

- Monitor the vibration of respective activities to ensure the limits for vibration are not exceeded. If they are exceeded measures shall be taken to reduce vibration;

"For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal"

- Identify locations such as schools, hospitals which may contain equipment sensitive to vibration and hold discussions with the respective institutions to ensure that the construction is managed to avoid negative effects of the use of the equipment

5. Waste Management

- Compile a Waste Management Plan (WMP) complying with international best practice, EU Waste Framework Directive and relevant Albanian regulation and covering all types of construction waste.

- Establishment of a waste management system generated on construction sites, construction and demolition waste, excavated soil, including the hazardous waste on the bases of best international practice;

- Guarantee that documentation for civil works contracts includes specific requirements for soil erosion prevention and definition of contractors' responsibilities.

- Guarantee that solid waste is collected and stored on site in accordance with the Waste Management Plan in containers of a suitable size and design, provided for secure storage and segregation of all wastes.

- Compile a Hazardous Materials Management Plan applicable to all sub-contractors and in compliance with Albanian regulations and EU requirements, and to be approved by Supervision Organization.

- Guarantee that selection, storage, use and disposal of hazardous materials shall be strictly controlled during construction in accordance with respective national and EU Directives requirements regarding worker health and safety and environmental protection, and good industry practice.

- Take operational measures for all aspects of waste avoidance, reduction, recycling, reuse up to the collection and disposal of waste; and

- Guarantee that full records are maintained for the type, quantity, composition, origin, disposal, destination and method of transport for all wastes

6. Ecological Environment

- Approve the good practice to the construction site for the protection of soil and follow the Albanian instructions and avoid excavation and filling in the rainy season, and

- Compile a detailed document to determine the species, age, height and condition of all trees to be cut down and this information shall be used to plan replacement planting.

7. Risks from Earthquake

- Carry out surveys and studies to assess the risks from earthquakes, floods and erosion;
- Carry out further studies to assess the risk from ground liquefaction (from earthquakes);
and
- Guarantee that the Project shall be designed and constructed dealing with these risks.

8. Emergency Planning and Response

- Prepare an Emergency Readiness and Response Plan for handling all foreseeable incidents, including fire, explosion, road accidents, earthquake and other hazards. The plan shall consider restrictions on materials e.g. explosives, gases etc..
- Prepare the plan in consultation with the local emergency services and include the plans for prevention, preparation and response to emergencies affecting road users (vehicles and pedestrians) and community. All necessary information shall be given to road users and the wider community; and
- Undertake a road safety audit by qualified independent 3rd party. The Operations Building must be designed to include a room for the emergency team and associated equipment.

9. Environmental Operation and Supervision Manual

- Preparation of an environmental operation and supervision manual by the contractors to be approved by the Ministry of Transport.

10. Complaint and Information Office

- Establish a complaint and information Office with a well trained staff, capable to handle complaints, crisis or conflicts with residents due to distress from environmental impacts.

11. Relocation of public services

- Make full preparations and carry out surveys in cooperation with the respective departments;
- Traffic management schemes should be established; possible emergencies and mitigation measures should be examined.

12. Information disclosure and consultation

- Develop a route-wide public information and education scheme to inform the local community as part of the SEP (Stakeholder Engagement Plan).

"For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal"

- Conduct public consultations with local residents to inform them about project activities and obtain comments. Temporary access roads should be constructed before blocking the construction roads.

- Information boards, construction timetable, feedback and complaint hotlines should be installed at the construction sites.

13. Cooperation with State Entities to monitor and control the activity within the Concession Area.

14. Introduction to environmental standards to be abided by all Persons operating within the Concession Area.

15. Introduction to environmental monitoring plan, to verify the prediction of environmental impacts assessment and determine environmental performance and impacts to surrounding area.

16. Preparation of a legal register for permits and approvals related to operational aspects, environmental and architectural / design.

17. Promotion of environmental awareness among the public.

The implementation of the EMP and the results should be annually published by the Concessionaire in the environmental report.

The realisation and implementation of the environmental management plan must meet the domestic regulatory requirements, international requirements, international best practice, and Lenders Requirements.

Appendix 14

(Appendix to be submitted by the contracting authority)

ESTIMATION OF WORKS

PROJECT SCOPE

The scope of the project is described as "Solution 3" in the document "Project Description" (the solution without underground parking) with the exclusion of the followings buildings:

- a) Shopping and cultural centre;
- b) Tower with office, Hotel and Conference rooms;
- c) Multilevel car parking;
- d) Motel;
- e) Tram-Train Station;
- f) Tram Depot.

The design of the Terminal must guarantee the Terminal full functionality, through the construction and the activation of the following buildings and facilities only:

- 1. Terminal access with roundabout on SH1 (RugaKastrioti);
- 2. Terminal Circulatory Roads with kiss and ride;
- 3. Bus, taxi-van and taxi Parking;
- 4. Travellers' buildings;
- 5. Footbridges;
- 6. Bus Garage and fuel service station;
- 7. Public space;
- 8. Environmental mitigation.

A complete list of all uses in buildings included in the Task 4 is in the solution 3 of the Project Description.

STANDARD LETTER FOR THE ELIMINATED TENDERER

[Insert date and place]

[Insert name and address of the contracting authority]

[Insert Tenderer's name and address]

Dear [Mr/Ms] [insert name of contact person of the economic operator]

Thank you for participating in the above-mentioned public procurement procedure. The procedure has been conducted in accordance with Public Procurement no.125/2013 "On concessions and public private partnership" and DCM no. 575, dated 10.7.2013 "On the adoption of rules for the evaluation and granting in concession/public private partnership (PPP)".

Your request to participate has been thoroughly evaluated according to the conditions and requirements given in the contract notice and in the tender dossier. We are sorry to inform you that you have been eliminated because of the following reasons:

If you believe that the Contracting Authority, during the public procurement procedure, has violated Law no.125/2013 "On concessions and public private partnership" and DCM 575, dated 10.7.2013 "On approval of rules for the evaluation and granting on concession/public private partnership", you have the right to file a complaint to the Procurement Review Body, according to the Law on "Concessions and public private partnership".

Even if we were not able to use your services this time, we believe that you shall still be interested in our concession/public private initiatives.

Respectfully,

[Name]

AWARD NOTIFICATION FORM

[Date _____]

To: [Name and address of the awarded Bidder]

Procurement procedure:

Short description of the contract: [Quantities, scope and duration of contract]

Previous publications (if applicable): Public Notice Bulletin [Date] [Number]

We notify you that the following have participated in this procedure with these respective offered values:

1. _____ Amount (expressed in figures and words) _____

2. _____ Amount (expressed in figures and words) _____

Etc. _____ Amount (expressed in figures and words) _____

The following Bidders have been disqualified:

1. _____

2. _____

Respectively for the following reasons:

[*the Contracting Authority*] notifies [[name and address of awarded Bidder] that the application submitted on [date] for participation in the concession [*name and general description of the contract scope*] has been accepted.

"For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal"

Contract negotiation deadline will be [*date*].

[*Bidder's name*] is required to submit to[*the Contracting Authority*] the following documents:

- A copy of the form notifying the Concession / Public Private Partnership Contract, signed.
- Providing contract in the form required in the standard bidding documents. Provision must be submitted no later than the time of signing the contract by both parties.
- Bank document certifying the committed payment of the costs of publication and specialized consultancy costs (if any). This payment shall be made before the beginning of negotiations.
- In case of withdrawal from the procedure, you should notify your withdrawal in writing.

..... Contracting Authority

Notification on Classification was made on the date of _____

Complaints: yes or no _____

(if applicable) received response in the date of _____

Appendix 17

GENERAL CONDITIONS OF THE CONTRACT

Consultancy Services

Article 1: Purpose

1.1 These General Conditions of the Contract (GCC) shall apply for the purchase of Consultancy Services.

1.2 The Law of the Republic of Albania 'On Public Procurement' provides that the provisions of the Civil Albanian Code shall apply to the contracts of public procurement. Some provisions of this Code are expressed in the GCC as well, in order to increase the level of transparency in the contractual conditions. However, quoting some provision in this part, does not deny in any way the application of the other provisions of the Civil Code for this contract.

1.3 Similarly, some provisions of the Law on Public Procurement are expressed again in the GCC, in order to increase transparency in the law which regulates public procurement.

However, the quoting of some provisions in this part, does not deny the application of other provisions of the Law on Public Procurement, regarding the parties' rights, duties and obligations.

1.4 The GCC shall apply to the extent they do not leave behind the conditions or provisions, foreseen in other parts of the contract.

The conditions of the contract also include the Special conditions of the Contract (SCC). In case of conflict between GCC and SCC. SCC shall prevail on the GCC.

Article 2: Definitions

2.1 "Contract" means the written agreement between the Contracting authority and the Contractor, which comprises the Tender Documents, including GCC and SCC, all attachments and completed forms, which are referred in each document.

2.2 "The deadline of works implementation" means the date that the work should be completed as stated in the Schedule for Work implementation, certified by the procuring entity.

2.3 "Total Estimation" means the indicative amount of work given in the project.

2.4 "Malfunction" means any part of the unfinished works in regarding the contract.

2.5 "Physical Entrance Date" is the date that the Contracting Authority allows the contractor on the project site.

2.6 "Starting Date" is included in the Contract Data. It is the date when the contractor will begin construction works. If this is not done, "starting date" will be the day that of payment in advance.

2.7 "Equipment" is the Contractor's machinery and tools brought to the project site temporarily for works implementation.

2.8 "Materials" means all supplies, including those of consumption, used by the contractor for performance of work.

2.9 "Object of Contract" means all the Goods and the Related Services that the contractor shall provide, complying with the conditions of the contract.

2.10 "Party (-ies)" mean the signatories of the contract. 2.11 "Representative of the Contracting Authority" shall be the person appointed by the Contracting Authority, responsible for administering the contract.

2.12 "Contracting Authority" means the entity that is part of this contract and contracts the works subject to this contract. This term shall have the same meaning with that defined in the law.

2.13 "Constructing site" means the physical place of works.

2.14 "Working Site Inspection Report" means the documents included in the tender documents that reflect and interpret factual information about the condition of the surface and subsoil of working site.

2.15 "Subcontractor" means any natural or legal person or a combination of the above, that provides works, materials or equipment, on behalf of the contractor.

2.16 "Contractor" means any natural or legal person that is a party of this contract and provides works according to the contract provisions.

2.17 "Technical Standards" means the specifications approved by a recognized standardization body for the continuous or repeated implementation. Such standards are used as rules, guidelines or definitions of characteristics to ensure that materials and services processed meet the purpose.

2.18 "Building the constructing site" means temporary construction works, that are necessary for implementation of construction works.

2.19 "Works" means what the Contracting Authority requires from the contractor to dig, build, repair, renovate or install as defined in the tender documents including services related to them, also defined in the tender documents.

Article 3 Drafting of the Contract

3.1 The notification of the awarded tender shall serve for the preparation of the contract between the parties, which should be signed within the time limit, expressed in the Tender Documents.

3.2 The existence of the contract shall be confirmed with the signature of the contract document, embodying all the agreements between the parties.

Article 4: Corrupted Practices, Conflict of Interest and Inspection of Reports

4.1 The Contracting Authority can request the Court to declare as illegal the contract, if he discovers that the Contractor carried out corruptive acts. Corruptive acts include all acts described in Article 26 of the Law on Public Procurement.

4.2 The Contractor should not have relations (current or past ones) with any of the consultants or any other entity, which participated in the preparation of the Tender Documents for the named procurement.

4.3 The Contractor should allow the Contracting Authority to inspect the accounts and the registers, which are related to the implementation of the Contract, or to nominate people appointed by the Contracting Authority, as controllers to inspect them.

Article 5: Confidential Information

5.1 The Contractor and the Contracting Authority should keep as confidential all the documents, data and other information provided by the other party, in relation with the Contract.

5.2 The Contractor can give to a Sub-contractor such documents, data or other information taken by the Contracting Authority to the extent required by the Sub-contractor to carry out its part of the work, in accordance with the Contract. In these cases, the Contractor shall include in his contract with the Sub-contractor a provision, which deals with confidentiality, as mentioned above in Paragraph 5.1.

Article 6: Intellectual Property

6.1 Except when otherwise provided in the Contract, all the rights of intellectual property, provided by the Contractor during the implementation of the Contract, shall belong to the

Contracting Authority, which may use them, as it deems appropriate.

6.2 Except when otherwise provided in the Contract, the Contractor, after the end of the Contract, should submit to the Contracting Authority all the reports and other data, such as maps, diagrams, specifications, plans, accounts, statistics and supporting registers or materials gathered or prepared by the Contractor during the implementation of the Contract. The Contractor can

keep copies of these documents and data, but he should not use them for purposes, which are not related to the Contract, without a preliminary written permission of the Contracting Authority.

6.3 The Contractor should insure the Contracting Authority against the lack of responsibility for infringement of rights related to the intellectual property, which may arise from the production or distribution of Goods, in accordance with the Contract.

6.4 If there is any claim or suit against the Contracting Authority, regarding any infringement of the intellectual property, caused during the implementation of the Contract or during the use of Goods, supplied in accordance with the Contract, the Contractor should provide to the Contracting Authority all the evidence and the necessary information, which is related to the named indictment or claim

Article 7: The Origin of Goods

7.1 There is no restriction on the nationality of origin of goods, unless specified in any resolution of the General Assembly of the United Nations.

7.2 The Contractor may be required to verify the origin of the goods.

7.3 For verification purposes, "origin" means the place where the materials are extracted, produced or joined, when through manufacturing, processing or collection of components, results in a new product known in the trade, that is substantially different in basic characteristics or in purpose or utility from its components.

7.4 Origin of Goods is distinct from the nationality of the contractor or subcontractor that supplies materials.

Article 8: Communication

8.1 Any communication between the parties must be in a writing form.

Article 9: Cooperation in the Constructing Site with Others

9.1 The Contractor shall cooperate and share the constructing site with other firms, public authorities, public services and the Contracting Authority as required and defined in Schedule of implementation of works.

Article 10: The responsibility of the Contracting Authority

10.1 The Contracting Authority has the responsibility to compensate the contractor for damage of equipment of the contractor as far as it is related to the actions of the Contracting Authority the projects of the Contracting Authority unless these errors were so obvious that could have been easily noticed by the contractor.

Article 11: The contractor performing the works

11.1 The Contractor shall perform and finish works in accordance with the technical specifications presented in the tender documents.

11.2 The contractor is not responsible for mistakes in the project, data, plan or other aspects of technical specifications provided by the Contracting Authority, unless the error was so obvious that the contractor should have noticed and advertised this to the Contracting Authority.

11.3 Codes and standards to be applied shall be stated in the tender documents. If there are changes in the implementation of codes or standards during the execution of the contract, these changes will be implemented only after being approved by the Contracting Authority.

Article 12: Execution of Works

12.1 The Contractor shall start, immediately after signing, the implementation of the contract and finish the works within the deadline.

Article 13: Technical and Environmental Safety

13.1 The Contractor shall take responsibility for the safety of all activities construction site.

13.2 The Contractor will provide the construction site safety, in such a way as to minimize environmental damage. For example, he must save energy, water and other resources, reduce loss and minimize the use of substances impoverishing the ozone layer, greenhouse gas, organic hazardous substances and other compounds, which damage health and the environment.

Article 14: Discoveries

14.1 Anything of historical interest or of a significant value unexpectedly discovered in the construction site will be declared to act in conformity with the legislation in effect. The Contractor shall notify the Contracting Authority for any such discovery and follow the instructions of the project management for objects management procedure.

Article 15: Availability of Construction Site

15.1 The Contracting Authority should give the contractor the right to dispose the site on the date of entry stated in the tender documents. If the availability of any part of the site is not given within date of entry for the constructing site or that part of the site as provided in the tender documents, it will be considered that the Contracting Authority has delayed the start of implementation of the contract and the contractor has the right to seek an amendment of the contract related to the postpone of implementation. The Contracting Authority and the Contractor shall keep records of the date of entry.

Article 16: Amendment of the Law and Rules

16.1 If, after the date of contract signing, any law, regulation, directive or procedure with the effect of the law in the Republic of Albania comes into force, is issued or amends and affects the conditions, including the date of delivery, or the contract price, the terms and conditions and the price of the Contract shall be regulated at the extent the Contractor has been affected in meeting his obligations, in accordance with the Contract.

Article 17: Force Majeure

17.1 The Contractor should not be held responsible for the loss of the Contract Security, for liquidated damages or cancellation for non-fulfillment, if, and to the extent the delay or any other failure in carrying out his obligations in accordance with the contract, is the result of a force majeure. 17.2 For the purposes of this article, "Force Majeure" means an unforeseen happening or event outside the control of the Contractor regarding fault or negligence. These events can include, but are not limited to the actions of the Contracting Authority, in its sovereign or contractual capacities, war or revolutions, fire, flood, earthquake, epidemics, quarantine pressure and transit embargo. 17.3 If a situation of a force majeure occurs, the Contractor should immediately notify the Contracting Authority. Except when the Contracting Authority gives different directives, the Contractor should continue implementing all its obligations, in accordance with the Contract, at a reasonable extent, and should require all reasonable means for this implementation, which are not obstructed by any Force Majeure.

Article 18: Negotiations and Amendments

18.1 Contracts prescribed by this Law can be changed by adding an annex to the contract, on the condition that this option is predicted in the tender documentation and contract.

18.2 Changes in the contract made by the contracting authority and the concessionaire / private partner.

18.3 Changes in the contract can be done on the initiative of both contracting parties especially in the following cases:

- a) when national security and defense of the country, environment, nature and human health are threatened;
- b) when the object of the contract is lost or when there is an objective impossibility for its use, in case of force majeure;

c) during changes in the legal framework;

d) in other cases that lead to changes of the real or legal situation of object usage or services provision, or contract fulfillment.

18.4 Changes of the essential terms of the contract that are not predicted in the tender documents and / or the contract itself, require the application of a new procedure of providing the concession / public private partnership contract.

18.5 Without violating the provisions of Articles 32 and 33 of the Law on concessions and public private partnerships, the term "essential conditions" refers particularly to conditions which, if had been included in the initial announcement of the contract or the tender documentation, would have made it possible for tenderers to submit a substantially different offer, as well as if changes would have exceeded the scope of the contract to the extent that these changes would have included services not initially covered.

18.6 The Contracting Authority requires a preliminary approval of the Ministry of Finance for all planned changes, which affect or create the risk of impact directly or indirectly on the state budget or the budget of local authorities or which may change in any way the financial support as defined by the law.

18.7 The Contracting Authority shall notify not later than 20 days Ministry of Finance on changes made in the contract in accordance with this section.

Article 19: Termination for Insolvency

19.1 The Contracting Authority may at any time terminate the contract if the contractor becomes bankrupt or insolvent.

19.2 The Contracting Authority should give a written announcement to the contractor for the termination.

Article 20: Cancellation in the public interest

25.1 The Contracting Authority may cancel the Contract at any time, if it deems that this decision shall be taken, in order to better serve the public interest.

25.2 The Contracting Authority should give a written notification to the Contractor, regarding this cancellation.

25.1 The Contracting Authority should pay the Contractor for all accepted Goods and related Services, which were delivered prior to cancellation and should pay the Contractor for the damages caused by the partial delivery of Goods and Related Services. While calculating the

value of damages, the Contractor shall be required to undertake all necessary actions, in order to minimize the damages. **Article 21: Subcontracting**

21.1 The contracting authority may:

- a) require the concessionaire to provide contracts that are minimally 30% of the total value of the concession contract to a third party, ensuring at the same time an opportunity for tenderers to increase this percentage, while this minimal percentage is specified in the concession contract;
- b) require the tenderers to indicate in their offerings the percentage of the total value of the contract that they plan to assign to third parties.

21.2 For the subcontracting of public-private partnerships, which are implemented as public works or public service contracts, respective provisions of the public procurement law are applied according to circumstances.

Article 22: Transfer of Rights

22.1 In accordance with the provisions of this Article, with the prior written consent of the contracting authority, the contract of concession / public private partnership can be transferred to a third person who meets the eligibility requirements set in the tender documentation, based on which the contract was initially awarded, except if these claims refer to conditions that are no longer required to fulfill the contract, due to the fact that the obligations and requirements mentioned before are already being consumed or being carried out by the previous concessionaire / private partner.

22.2 The transfer of the concession contract does not affect the quality or worsens the continuity of performance and the fulfillment of the contract.

22.3 When the concessionaire / private partner is a subject for special purposes, then the change of ownership rights or entity management for specific purposes (SPV) as a result of the transfer of capital or shares of the business, cannot be applied without the consent of the contracting authority and the Ministry of Finance, unless this is a result of regular trading of shares in a regulated capital market.

22.4 The Contracting Authority requires the preliminary approval of the Ministry of Finance for all transfers planned in the contract, which affect or create a risk of impact in any way on the state budget or the budget of local governments, or which may change financial support in any way, as determined by this law.

22.5 A contracting authority shall notify the Ministry of Finance for the transfers of the contract made in accordance with this section.

Article 23: Contract Insurance

23.1 Within __ days from the receipt of the notification for the contract award, the Contractor should give to the Contracting Authority the guarantee of a Contract Insurance at the acceptable amount and form, as specified in the Contract. Failure in providing a Contract Insurance in the required form and amount, within __ days, shall result in the cancellation of the Contract and in the forfeit of the Contractor's Tender Insurance.

Article 24: Legal framework

29.1 The Contract shall be governed and interpreted following the Laws of the Republic of Albania. **Article 25: Settlement of Disputes**

25.1 The Contractual Authority and the Contractor must make any possible effort to settle disagreements or conflicts between them or regarding this agreement through direct negotiations.

25.2 If the parties fail to settle the disagreement or conflict, the problems will be considered through the dissolution of agreements according to the contract and the law procedures in force in virtue of the legislation of the Republic of Albania. **Article 26: Representation of Parties**

26.1 Each party must nominate by a written document a person or organizational position, which will be responsible, on behalf of the party, for the receipt of communications and the representation of the party during the contract's execution.

26.2 Each party must immediately inform the other party on any modification in the nomination of party's representative. If one of the parties fails to inform the other, it must assume any losses caused as result of the failure to give sufficient notice.

26.3 The parties may nominate additional organizational units or persons to represent the party in specific actions or activities. In this case, the written notice must specify the extent of representative's authority.

Article 27: Notices

27.1 Any notice given by one of the parties to the other party according to the contract must be written in a document in the address specified in the contract.

27.1 The notice will come into effect immediately upon handing over. **Article 28: Calculations of Deadlines**

28.1 All day references will be given in calendar days unless otherwise stipulated.

"For Design, Construction, Financing, Operation, Maintenance and Transfer of
Tirana Public Transport Terminal"

Appendix 18

SPECIAL CONDITIONS OF THE CONTRACT

Consultancy Services

The following special conditions of the Contract will be a complement part of the General Conditions of the Contract. In case of discrepancies between the GCC and SCC, the SCC shall prevail.

Article 1: Definitions

1.1 The Contracting Authority is: _____

1.2 The Contractor is: _____.

Article 2: Performance Security

2.1 Performance security in the amount of _____ should be offered from the contractor to ensure the execution of his duties according to the contract.

2.2 Performance security shall be issued or returned, immediately to the Contractor according to the _____ following _____ form-

Article 3: Representative of the Contracting Authority

3.1 The representative of the Contracting Authority: _____

3.2 Address: _____

Neni 4: Constructing site

4.1 Constructing site shall be (Precise description of the location):

Neni 5: Starting Date

5.1 This contract: _____

Neni 6: Contract Type
